9.00 am hello stefan

news: patients will not be evacuated by helicopter.  
franken wants icrc to do it, because un might not be able to reach  
kladanj with their vehicles.  
franken has been in contact with icrc. no finalisation yet, but it  
seems that we cannot leave today.  
stephan, should msf at this stage not be more involved in the whole  
procedure of evacuation?  
would it not be msf to request icrc together in cooperation with un?  
please advice.  
please keep in mind the 30 trucks of unhcr? could they not do it?  
i think priority is to get the patients out soon. if it takes too  
long bsa might take the job over.  
we have seen how fast they have deported the whole population and  
nobody was able to stop it. they want to empty the enclave.  
it is not clear, what will happen with dutchbatt afterwards.  
hostages?

cc dule s case. as i thought already, franken has no other solution  
either. i offered dule to take him in our car, but he wanted this  
only if i give him poison so he could commit suicide in front of all  
of us.  
so my objective is to get at least his sister out. i understand, that  
she likes to leave, but dule wants to kill her. so i will put a  
bluehelmet at her bed to protect her. we will have to give her plenty  
diacepam for the way.  
again - if dule would be with us and bsa will of course take him,  
would this not endanger all the other male local staff? like they did  
with the patients in bratunac?  
i will let dule go. he will have to decide himself. it is a pity  
that we didnt know the whole story before.

the patients will be moved into a clean place, since the danger of  
shelling seems to be over. there we will have more light and hygiene  
and better working conditions.

i will call you at 10.00 am.  
kisses christina
